STAHL

Your bi-monthly update to news and updates within R.Stahl, UK

Edition 1

Instrumentation North 2008

To kick start our first ever edition of Stahl News, we wanted to update you on Instrumentation North which was held at the Leeds Elland Road Stadium on the 9 & 10 April. The team from Stahl attended both days to ensure that all visitors

were able to see our full product range including some fantastic new additions.

We had a great couple of days, and enjoyed a chance to meet potential customers and suppliers. If you were

If you have any news or feedback for Stahl News, then please contact us today on: marketing@rstahl.co.uk

unable to attend, then why not contact us to request a catalogue or to order a copy of the article on wireless technology that we had provided free of charge on the day. If you missed us in Leeds, then we will be attending Instrumentation Scotland on 3rd-4th September, so come along to meet our team.

You can visit us online at www.rstahl.co.uk or feel free to give us a call on 0121 767 6400 to speak to a member of our sales team.

The Touring Trailer

As well as attending exhibitions, we have been pursuing the idea of a Touring Trailer, fully customised to offer you the best environment to learn about our products. The trailer offers a chance for you to view and test our product range in comfort, with a member of staff always on hand to provide further details.

If you would like to arrange for the trailer to visit your premises, then please email info@rstahl.co.uk with your details. We will gladly arrange a suitable time to show you all benefits and the reassurance of purchasing from Stahl; your safety is our reality.

Latest additions...

We are constantly seeking new items that are relevant to hazardous areas, and suitable for your needs.

Most recently, we have added the Helideck Perimeter Light (compliant with CAP 437 and ICAO regulations) the Gub box and camera equipment, all fully compatible for use in an EX environment.

We are also strongly exploring the possibilities of wireless technology in hazardous areas and the potential benefits. This solution allows the reduction of costs for laying expensive cables. Please contact us for a discussion of options for wireless technology.
